- · Available in Flat, Angled, and Recessed
- Tunable-white Lighting from Warm White 2700K to Daylight White 5000K and all shades of white in between

Selecting an LED Linear Fixture

Selecting Desired Profile Style

STEP 2 Select the desired profile style

Things to keep in mind when selecting profile style: flat fixtures work great for under cabinet; use an angled fixture to illuminate interior cabinets; and use a recessed fixture for a flush, sleek install under a shelf.

Each lumen output features 3 different profiles that can be used in various ways throughout the kitchen and home. Use the **Angled Profile (P3)** under or inside cabinets, or in the toe kick, to angle light where it's needed. Use the **Flat Profile (P7)** under cabinets to illuminate the workspace directly below. Use the **Recessed Profile (PX)** under cabinets or shelves for a flush, sleek finish.

The single-white lighting fixtures are available in **Soft White 3000K** and **Cool White 4000K** white color temperatures. The tunable-white lighting fixtures allow users to change the white color temperature from Warm White 2700K to Daylight White 5000K and anywhere in between.

Fixtures are available in 12-volt and 24-volt options.

LED Linear Fixture Profiles

STEP 3 Select desired length of fixture

Check out the chart on our website to see how LED Linear Fixtures are made easy to order by wall cabinet width size.
